

# Dunbarton

## Green Infrastructure Conservation Priority Plan

### Map 6. Water Quality Resources Co-Occurrence Analysis

**Featured Water Quality Data Layers:**

- Named streams, associated wetlands and 250' resource areas
- Unnamed streams, associated wetlands and 100' resource areas
- Floodplains
- Public Water Supply Sanitary Protective Radii
- Wellhead Protection Areas
- Army Corps Flowage Easement
- Stratified Drift Aquifers

This map displays a subset of the overall natural resource weighted co-occurrence analysis. Resource types were ranked relative to one another in terms of their importance or value to create "natural resource scores" for each category above. This map shows the combined natural resource scores for all areas in town. Dark areas represent higher scores where high value or multiple water quality resource types are present.

**Legend**

**Water Quality NR Scores**

- 0 - 5
- 5.1 - 10
- 10.1 - 15
- >15

**Other Features:**

- Lands Under Conservation
- Lakes and Ponds
- Rivers and Streams
- Power transmission line

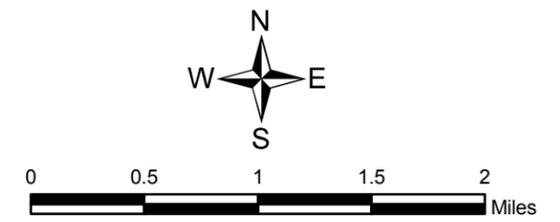

**Roads**

- Class I, II, IV State Highways
- Class V Town Maintained Roads
- Class VI Unmaintained Roads
- Other (private roads, trails, etc.)
- Dunbarton Town Boundary

Data Sources: 1:24,000 source scale data from NH GRANIT, NH Department of Transportation, NH Department of Environmental Surfaces, Dunbarton Conservation Commission, and CNHRPC.

NOTE: "Lands Under Conservation" includes publicly and privately owned lands as well as properties under deed restriction or conservation easement. The lands shown here include local, state, federal, and private ownership and/or management.

This map is intended for planning purposes only. Created May 2010 by CNHRPC.

Funding provided by the NH Department of Transportation through the I-93 Community Technical Assistance Program.
